## EXPERIENCE

### Senior Software Engineer, Mobile & Web

Bizne MX

Sep 2025 – Present | Mexico City, Mexico

*Stack:* Dart, Flutter, Getx, Next.js, BFF, AI-assisted development

- Promoted from Mobile Developer (Sep 2025 – May 2026) to Senior Software Engineer (Jun 2026).
- Built and maintain the new Flutter version of the Bizne apps end to end: push notifications, location, maps, camera and QR scanning.
- Built Next.js web apps with a Backend for Frontend (BFF) architecture and integrated them into the mobile apps through a native shell.
- Use AI agents to speed up development and refactoring while keeping code quality high.
- Bizne user app, Bizne POS app.

### Professor of Data Structures and Algorithms

University of Havana

Apr 2022 – Present | Havana, Cuba

- Teach the Data Structures and Algorithms course; previously Student Assistant (Apr 2022 – Mar 2025) in Algebra and Data Structures and Algorithms.

### Full Stack Developer

jobs2live

Sep 2023 – Sep 2025 | Madrid, Spain

*Stack:* TypeScript, React, Antd, Next.js, C#, .NET, PostgreSQL, OData, Playwright, Nodriver, Web Scraping

- Helped build the company platform from the ground up, modeling the domain and structuring the website.
- Designed an N-layer architecture with the CQRS pattern and automated code generation for entity models.
- Designed the PostgreSQL data model and built the React UI with Antd.
- Built LinkedIn scrapers and bots that automate interaction with the website.
- jobs2live website.

### Mobile Developer

Business Seed

Feb 2024 – Dec 2024 | Mexico City, Mexico

*Stack:* Dart, Flutter, Getx

- Built hybrid Android and iOS apps from scratch and integrated them with REST APIs, shipping MVPs in short timeframes.
- Implemented push notifications, location, Google Maps, camera, QR scanning and local controllers for the Android client of the collection machine.
- Applied Clean Architecture, design patterns and SOLID principles.
- User, collector and machine apps for the Loop project; delivery app for the El Navegante project.

## SKILLS

**Mobile:** Flutter, Dart, Getx

**Web:** React, Next.js, TypeScript, JavaScript, Antd

**Backend & Data:** C#, .NET, Go, PostgreSQL, MySQL, OData, BFF

**Programming:** C/C++, Python, Rust

**Tools & Other:** Git, Docker, Playwright, Nodriver, Web Scraping, AI-assisted development, Research

## LANGUAGES

- Spanish – Native.
- English – Technical reading proficiency.

## PROJECTS

### Undergraduate Thesis

An Approximation to the Language of All Satisfiable Boolean Formulas

- Links SAT with formal language theory; shows that Range Concatenation Grammars capture all NP problems.

### Travel Agency

A website for the interaction of tourists and travel agencies

- React, Antd, .NET, MySQL and OData.
- Travel Agency website

### Teslo Shop

An e-commerce

- React, Next.js, Tailwind CSS and PostgreSQL.
- Teslo Shop website

### Matcom Social

A social network

- React, Material UI, Go and PostgreSQL.
- Matcom Social website

## EDUCATION

### Bachelor's degree in Computer Science

University of Havana - Cuba

Nov 2021 - Mar 2025

- Programming, Algebra, Data Structures, Algorithms, Databases, Distributed systems

## ACHIEVEMENTS

- Participation in mathematics competitions (2 times national preelection).
- 10th place in ICPC-2021 Caribbean Finals.
- 12th place in ICPC-2022 Caribbean Finals.
- Silver Medal in ICPC-2023 Caribbean Finals.
- Summa Cum Laude and Scientific Merit Award (Bachelor's Degree).
